

In the Specification

Please replace paragraph [0002] with the following:

Technical Field of the Invention

~~The invention~~ This disclosure relates to packages for digital recording supports in the form of a disk such as CD's, DVD's, mini CD's and the like.

Please replace paragraph [0010] with the following:

Summary of the Invention

~~This invention relates to~~ I provide a package for a digital recording support in the form of a disk formed by a plate with a disk centering piece, wherein the plate includes at least two radial shoulders defined to cover, when at rest, a marginal zone of the disk and define with the bottom of the plate a slot with a height approximately equal to the thickness of the disk.

Please replace paragraphs [0011] through [0013] with the following:

The invention will be better understood from a reading of the following description that refers to the attached drawings concerning non-limiting exemplary embodiments in which:

Fig. 1 is a top view showing an exemplary embodiment of the package in accordance with aspects of the invention;

Fig. 2 is a section AA of the package of Fig. 1;

Fig. 3 is a sectional view of ~~an embodiment~~ one structure of the package;

Fig. 4 is a top view ~~showing an embodiment in accordance with aspects of the invention of~~ the package;

Fig. 5 is a sectional view of the ~~embodiment~~ structure shown in Fig. 4;

Fig. 6 is a top view of another ~~embodiment in accordance with aspects of the invention~~ structure;

Fig. 7 is a top view of yet another ~~embodiment in accordance with aspects of the invention~~
structure;

Figs. 8 to 10 are detailed views along sectional planes BB, CC and DD, respectively;

Fig. 11 is a perspective view of another ~~exemplary embodiment~~ example of a package for two digital recording supports;

Fig. 12 is a top view of the package of Fig. 11;

Figs. 13 to 15, respectively, are a front view in perspective, a rear view in perspective and a top view of another ~~exemplary embodiment~~ structure for two digital recording supports; and

Fig. 16 is a perspective view of the package of Figs. 13 to 15 in which the digital recording supports are arranged in the package.

It will be appreciated that the following description is intended to refer to specific ~~embodiments of the invention~~ structures selected for illustration in the drawings and is not intended to define or limit ~~the invention~~ these structures, other than in the appended claims.

~~This invention relates~~ I provide a general sense to a package for a digital recording support in the form of a disk formed by a plate with means for centering the disk, characterized in that the plate comprises at least two radial shoulders arranged on both sides of a median line for positioning the disk, which radial shoulders are defined so as to cover when at rest a marginal zone of the disk and to define with the bottom of the plate a slot with a height approximately equal to the disk thickness.

Please replace paragraph [0018] with the following:

It is advantageous if at least one of the stops is arranged at the level of one of the slots formed by one of the shoulders and the bottom of the plate. According to a particular configuration ~~of the invention~~ at least one of the stops is supported by one of the shoulders.

Please replace paragraph [0028] with the following:

Turning now to the drawings, Figs. 1, 2 and 3, respectively, show a top view and a section of an exemplary aspect of the ~~invention~~ structure and a section of another structure ~~aspect of the invention.~~

Please replace paragraph [0098] with the following:

Although this ~~invention~~ disclosure has been described in connection with specific forms thereof, it will be appreciated that a wide variety of equivalents may be substituted for the specified elements described herein without departing from the spirit and scope of ~~this invention~~ the disclosure as described in the appended claims.
